CORE SKILLS

Penetration testing
Vulnerability management
Security scanning
Vulnerability research
Security operations
Systems administration
Security automation
Technical documentation
Security training
ChatGPT
Claude Code
OpenAI Codex
Used to pentest with tight deadlines
Test OpenSource Tools

PROFESSIONAL SUMMARY

With nearly three decades of IT experience, I bring a broad range of technical expertise and a proven ability to contribute effectively across diverse roles.

I am a Cybersecurity and IT professional with experience in penetration testing, vulnerability management, security operations, and systems administration.

I do not just run tools; I am as comfortable hitting F12 on a website and hacking the JavaScript as I am running a full test in Burp, Zap, or other scanning software.

Skilled in assessing external infrastructure, researching vulnerabilities, developing security tools and automation, and producing clear reports and technical documentation. Background includes federal government security work and enterprise IT environments.

PROFESSIONAL EXPERIENCE

Senior Penetration Tester & Tooling Specialist
Live Nation Entertainment · Hollywood, CA / Remote
July 2022–October 2026

Use AI to build tools, agents, GPT's, artifacts, swarms and skills to automate pentesting procedures to increase efficiency.

Conduct penetration tests of external websites and infrastructure; document findings in Faraday, and present to PCI auditors.

Develop and maintain tools and projects supporting penetration testing and vulnerability research, using both opensource and OTC software.

Use AI to research CVEs and vulnerable software to inform assessments.

Run Tenable scans and use CrowdStrike investigations to identify potentially vulnerable software and systems.

Create and present team training and technical documentation.

Build virtual machines using ESXi and Proxmox; maintain inventories of external websites.

Work with other teams, such as incident response, when I discover vulnerabilities or other issues on our websites.

TOOLS
Tenable · CrowdStrike Falcon · Faraday · Burp Suite · Wireshark · Kali Linux · Vectra · Cybereason · Kibana · Ansible · BigFix · SCCM · VMware ESXi · Proxmox,-ChatGPT- Claude-Codex-Zap Proxy- Project Discovery Tools

CERTIFICATIONS
CompTIA PenTest+
CompTIA A+

TRAINING
SANS SEC542: Web App Penetration Testing and Ethical Hacking
Professional Writing · Technical Writing · Visio · Red Hat JBoss · ITIM · Subversion · CA Identity Management - Crowdstrike threat hunting course

EDUCATION
Coursework: Washington State Community College; West Virginia University at Parkersburg; West Liberty State College

Senior Systems Engineer, Information Security Operations
Live Nation Entertainment · Hollywood, CA / Remote
November 2021–July 2022
• Deployed, monitored, and maintained Tenable scans, including PCI ASV scanning and attestation activities.
• Built, patched, and monitored physical and cloud servers.
• Used Vectra, Cybereason, Kibana, and Tenable to investigate potential threats and vulnerabilities.
• Developed Slack and Tenable API integrations and used Ansible to automate routine tasks.
• Coordinated with teams and vendors; prepared reports, procedures, and documentation.

IT Specialist (Systems Administrator), GS-12/7
Security and Vulnerability Response Team, Information and Security Services
Bureau of the Fiscal Service · Parkersburg, WV
September 2019–November 2021
• Ran vulnerability scans and reports using Tenable Security Center.
• Used CrowdStrike Falcon to identify unauthorized software and support remediation.
• Managed patches and software installations using BigFix and SCCM; created Group Policy settings aligned with DISA STIG recommendations.
• Coordinated with auditors and support teams on security controls and remediation.
• Automated email outreach related to Data Loss Prevention reports with PowerShell.
• Supported security initiatives and presented at SecureWV and DerbyCon.

Middleware Application Division
Bureau of the Public Debt · Parkersburg, WV
February 2013–September 2019
• Troubleshot, upgraded, monitored, and developed web servers.
• Identified and reported application and web-log security issues.
• Wrote hardening and build guides, project plans, procedures, and technical documentation.
• Supported security improvements in MQ environments across Windows, AIX, and mainframe systems.

Management and Identity Branch
Bureau of the Public Debt · Parkersburg, WV
September 2011–February 2013
• Supported the HSPD-12 PIV project, helping manage user data and streamline PIV card processes.

Earlier Career
Experience in banking, chemical, agricultural, supply, and technology industries.
